

## INDEX TO SUBJECTS

## A

- Abstracts, 86th Annual Scientific Meeting-157
- Acceleration  
in suborbital spaceflight, risks to participants with cardiac malformations-999  
scrotal hematoma after centrifuge training in fighter pilot with varicocele-1063
- Accelerometers, determining psychomotor performance of helicopter pilots-641
- Accidents  
evaluation of Human Factors Analysis and Classification System-728  
*Loss of Signal-Aeromedical Lessons Learned from the STS-107 Columbia Space Shuttle Mishap* (Book Review)-752
- Actigraphy  
6-month assessment of sleep at sea during naval deployment-481  
cabin crew sleep and fatigue on ultra-long range flights-705
- Acute ischemic stroke, manual cervical manipulation leading to-1066
- Acute mountain sickness  
effects of hypoxia, hypobaria, and exercise duration-614  
exhaled nitric oxide in-693  
statin use and-97
- Adrenal myelolipoma, aeromedical disposition after nephrectomy and splenectomy-421
- Aerial platforms, ad hoc, cabin temperature effect on crew well-being on-125
- Aerobic exercise capacity  
effects on cardiac autonomic control in fighter pilots-875  
responses to long-duration spaceflight on ISS-A78  
upper body, as predictor of lower body performance-599
- Aeromedical disposition  
acute low back pain in a fighter pilot-842  
after nephrectomy and splenectomy for adrenal myelolipoma-421  
atypical optic neuritis with Uhthoff phenomenon-845  
brief reactive psychosis-69  
bronchogenic cyst-144  
cholelithiasis-577  
complex regional pain syndrome-574  
eosinophilic esophagitis-418, 742  
epilepsy in a fighter pilot-500  
for arrhythmogenic right ventricular cardiomyopathy-756  
hand, foot, and mouth disease-497  
herpes zoster in a flight surgeon-754  
incidental suprasellar mass in military flying cadet-477  
keratoconus in a flight surgeon-1004  
lateral epicondylitis in a pilot-1077  
Meckel's diverticulum in a student fighter pilot-1006  
Ménière's disease-662  
Miller-Fischer syndrome-918  
Parkinson's disease-1046  
pneumocephalus and neurosurgery in rotary aircrew-59  
priapism caused by sickle cell trait-665  
pulmonary sarcoidosis-67  
sudden foot drop after centrifuge training-146  
vitamin A toxicity from-920  
white matter hyperintensities after prior trauma with LOC-928
- Aeromedical evacuation—*See also* Emergency medical services  
pulmonary artery pressure response to simulated air travel-529  
use of portable oxygen concentrators in-351
- Aerospace Medical Association (AsMA)  
86th Annual Scientific Meeting Program and Abstracts-153  
Association Business-327  
Association News-151, 583, 669, 763  
bylaws and proposed changes-333  
making a difference in aerospace medicine-343, 427  
medical guidelines for air travel—*See* Medical Guidelines  
past presidents-327  
position paper on sleep apnea screening in morbidly obese pilots-835  
President's page-2, 75, 153, 343, 427, 507, 587, 687, 773, 851, 927, 1013  
recommendations on pilot mental health-1013  
tax code status of-851
- Aerospace medicine  
history of—*See* History  
importance of-75
- Aerospace Medicine and Human Performance*  
making a difference-2  
welcome-1
- Aerospace medicine specialist-507
- Ageing, preventing prospective memory failures in pilots-366
- Air traffic controllers  
eosinophilic esophagitis in-418  
quality of life, health, and sleep with different shift systems-895
- Air travel  
AsMA medical guidelines for—*See* Medical Guidelines  
in-flight echocardiography after scuba diving week-488(Letter)  
simulated, pulmonary artery pressure response in hypobaric chamber-529  
transcranial bright light and symptoms of jet lag-344, E1, E2, E3(Apr)
- Aircraft—*See also specific aircraft types*  
delayed ejection in mishaps-774  
*Fast Flying Jets: Human Factors and Performance Limitations* (Book Review)-143  
cabin temperature and aircrew well-being on ad hoc platform flights-125  
environmental tobacco smoke on, pilots' medical symptoms related to-458  
inventor of sealed cabin-581
- Aircrew Flight Frame Operational style, assessment of alternative Army aircrew eyewear-1014
- Aircrew—*See also* Military aircrew and Pilots  
otosclerosis and fitness to fly-1039
- Airports, humans as critical factor in aviation security (Commentary)-915
- Allergy, immune effects of prolonged simulated microgravity-803
- Altitude effects  
exhaled nitric oxide in acute normobaric hypoxia-693  
hypobaric hypoxia effects on contrast sensitivity-118  
impact on sleep in Antarctica-392  
increased prevalence of white matter hyperintensities-928  
overactive performance monitoring at chronic high altitude-860  
oxygen requirement to reverse hypoxemia-351  
real-time effects of transient near-anoxia on-76  
statin use and acute mountain sickness-97  
unusual ocular complication of barotrauma at altitude-994
- Amphibious vehicles, rebreather unit to prolong underwater survival time-1028
- Anemia, with Meckel's diverticulum-1006

## Animal models

- DDFPe for decompression sickness in rats-21
- effects of weightlessness and iron excess-8, E1(Jan)
- first aid for decompression illness in goats after simulated submarine escape-1020
- immune effects of prolonged simulated microgravity in mice-803

## Antarctica

- altitude and seasonality impact on sleep in-392
- statin use and acute mountain sickness in-97

## Anxiety, cognitive and virtual reality treatment program for fear of flying-723

## Aortic insufficiency, potential risks to commercial spaceflight participants with-999

## Apnea training, hypercapnic ventilatory response before and after-27

## Apollo program, review of lower body negative pressure research in-633

## Arm-cranking exercise

- exercise tests and simulated mission task performance in astronauts-982
- predicting lower body performance with-599

## Arrhythmogenic right ventricular cardiomyopathy, aeromedical disposition-756

## Artificial gravity—See Microgravity, simulated and Simulated spaceflight

## Asthma, immune effects of prolonged simulated microgravity on-803

## Astronauts—See also Cosmonauts and Spaceflight

- aerobic exercise responses to long-duration spaceflight on ISS-A78
- assessment of postural stability after return from ISS-A45
- causes of shoulder injury in space suits-606
- challenges of estimating fracture risk with DXA-628
- Cognition test battery for, development and validation of-942, E1(Nov)
- evaluating bone loss in ISS astronauts-A38
- Exercise Countermeasures: The First Decade on ISS (Supplement to December issue)-A1
- exercise tests and simulated mission task performance-982
- group dynamics during isolation at space station analogue-819
- hypobaric decompression sickness treatment model-508
- isokinetic strength changes after long-duration spaceflight on ISS-A68
- physical training for long-distance spaceflight-A14
- team composition for future space explorations-548, E1(June)
- training in remote-guidance ultrasound for exploration spaceflight-1034
- upper body aerobic exercise as predictor of lower body performance-599

## Ataxia, assessment postural stability after return from ISS-A45

## Automatic implantable cardioverter defibrillator (AICD), for arrhythmogenic right ventricular cardiomyopathy-756

## Autonomic circulatory regulation, dose-effect relationship with mild levels of hypergravity-535

## Autonomic nervous system, physical fitness and dehydration effects on cardiac-875

## Autonomic responses, fluid loading effects in head-down tilt-88

## Aviation—See also Aircraft and Pilots

- factors association with delayed ejection during-774
- security screening, humans as critical factor in (Commentary)-915
- training general aviation pilots for convective weather situations-881

## Aviator spectacles, assessment of alternative Army aircrew eyewear-1014

## B

## Back pain

- flight bags as cause of injuries in commercial pilots-563
- in fighter pilots related to modern air combat developments-936
- low—See Low back pain

## Barometric pressure changes, pneumocephalus and neurosurgery in rotary aircrew-59

## Baroreflex, cardiac, response to mild levels of hypergravity-535

## Barotrauma

- dental, in military divers-652
- unusual ocular pathology at altitude-994

## Bed rest

- historical review of lower body negative pressure research-633
- low back pain in-541
- short-term, effect on portal and lower limb veins-524

## Behavior adaptation, confinement vs. isolation in Mars mission models-131

## Biomechanics, restraint harness performance during flight maneuvers-466

## Blackhawk UH-60 helicopters—See Helicopters

## Blind flying, origin of instrument flying-923

## Blogs, as research resources for scientists and clinicians-415

## Blood pressure

- during combined cognitive stress and lower body negative pressure-688
- evolution of monitors during first decade on ISS-A7

## Body mass changes, during long-duration spaceflight (Commentary)-1070

## Bodyweight, effects of iron overload and weightlessness in rats-8, E1(Jan)

## Bohannon, Lt. Gen. Richard L., training pilot-physicians for Manned Orbiting Laboratory program-1010

## Bone densitometry, challenges of estimating fracture risk with-628

## Bone loss

- due to iron excess and weightlessness-8, E1(Jan)
- evaluating in ISS astronauts-A38
- in astronauts, challenges of estimating fracture risk with DXA-628

## Bone mineral density

- evaluating in ISS astronauts-A38

## Book reviews—See Reviews

## Boyle's law, hypobaric decompression sickness treatment model-508

## Bradykinesia, in Parkinson's disease, aeromedical implications in civilian pilots-1046

## Brain lesions, incidental suprasellar mass in military flight cadet-477

## Braslet-M thigh cuffs, evolution during first decade on ISS-A32

## Breath-hold time

- before and after apnea training-27
- in air and water during helicopter underwater egress training-82

## Breathing, diaphragmatic, for motion sickness management-452

## Bronchogenic cyst, aeromedical disposition-144

## Brownout conditions

- BrownOut Symbolology System, in-flight testing in degraded visual environments-714
- testing in simulated degraded visual environments-588

## Bruxism, craniofacial muscle thermography in military pilots with-374, E4(Apr)

## C

## Cabin crew, managing sleep and fatigue on ultra-long range flights-705

## Cabin decompression

- positive pressure breathing simulation model at ground level-15
- subtle presentation of decompression sickness after-1058

## Cabin humidity, stresses of flight, in AsMA medical guidelines for air travel-486

## Cabin pressure

- pulmonary artery pressure response to simulated air travel-529
- stresses of flight, in AsMA medical guidelines for air travel-486

## Cadet, military flight, incidental suprasellar mass in-477

## Caffeine, brief reactive psychosis due to sleep deprivation and-69

## Calf veins, effect of 5-day bed rest with microgravity countermeasures-524

- Canadian Space Agency (CSA), physical training for long-duration spaceflight aboard ISS-A14
- Carbon dioxide  
cerebrovascular response to, after intermittent hypoxia-782  
retention in recreational rebreather divers-41  
sensitivity to, before and after apnea training-27
- Cardiac baroreflex, response to mild levels of hypergravity-535
- Cardiac implanted devices, simulated suborbital, spaceflight in subjects with-410
- Cardiology  
arrhythmogenic right ventricular cardiomyopathy-756  
risks to suborbital spaceflight participants with cardiac malformations-999
- Case reports  
6-month assessment of sleep during naval deployment-481  
cervical manipulation leading to cerebellar stroke in pilot-1066  
eosinophilic esophagitis with dysphagia and food impaction-742  
G tolerance in diabetics with implanted insulin pumps-407  
incidental suprasellar mass in military flying cadet-477  
isolated perivesicular hematoma after military parachuting-136  
mechanical neck pain in helicopter pilots-907  
personality factors in unsuccessful special forces polar expedition-567  
pneumocephalus and neurosurgery in rotary aircrew-59, 414(Letter)  
risks of commercial spaceflight participant with cardiac malformations-999  
scrotal hematoma after centrifuge training in pilot with varicocele-1063  
simulated suborbital spaceflight in subjects with cardiac implanted devices-410  
subtle presentation of decompression sickness-1058  
unusual complication of barotrauma at altitude-994
- Centrifugation, intermittent, as countermeasure during 5-day bed rest-524
- Centrifuge training  
acute spinal injury in fighter pilots after-386  
scrotal hematoma after, in fighter pilot with varicocele-1063  
sudden foot drop after-146
- Cerebral blood flow velocity, during combined lower body negative pressure and cognitive stress-688
- Cerebrovascular control, response to CO<sub>2</sub> after intermittent hypoxia-782
- Cervical manipulation, manual, leading to vertebral artery dissection and stroke in a pilot-1066
- Cervical spine  
neck pain and sagittal alignment in Air Force pilots-445  
neck pain in F-16 vs. Typhoon fighter pilots-402  
neck pain in helicopter aircrew due to night vision goggles-46
- Chest X-rays, bronchogenic cyst-144
- Chibis lower body negative pressure suit, use during first decade on ISS-A32
- Cholelithiasis, in Air Force aeromedical evacuation nurse-577
- Cholesterol, statin use and acute mountain sickness-97
- Clearances, medical, for air travel, AsMA medical guidelines on-656
- Cognition test battery, for spaceflight, development and validation of-942, E1(Nov)
- Cognitive behavioral techniques, in treatment program for fear of flying-723
- Cognitive deficits, of normobaric hypoxia, recovery time from-357
- Cognitive performance  
humans as critical factor in aviation security (Commentary)-915  
preventing prospective memory failures in pilots-366  
real-time effects of transient near-anoxia on-76
- Cognitive stress, cerebral blood flow velocity during lower body negative pressure and-688
- Cold water immersion, breath-hold times during helicopter underwater egress training-82
- Color vision  
comparison of Color Dx Military Research test and three printed tests-852  
modified protocol for screening-747  
quantification of using tablet display-56  
unusual ocular complication of barotrauma at altitude-994
- Columbia space shuttle, *Loss of Signal-Aeromedical Lessons Learned from the STS-107 Columbia Space Shuttle Mishap* (Book Review)-752
- Commercial airline pilots  
flight bags as cause of back injuries in-563  
managing cabin crew sleep and fatigue on ultra-long range flights-705  
medical symptoms associated with work and home environments-458  
solar eye protection practices of civilian aircrew-953
- Commercial airlines  
emergency medical kit contents for in-flight medical care-572  
first aid kit contents for in-flight medical care-572  
special services, AsMA medical guidelines on-657  
universal precautions kit contents for in-flight medical care-572
- Commercial off-the-shelf aircraft, cabin temperature effect on military crew well-being on-125
- Commercial spaceflight participants  
cardiac implanted devices in-410  
G tolerance in diabetics with implanted insulin pumps-407  
with Tetralogy of Fallot-999
- Complex regional pain syndrome, aeromedical disposition-574
- Computerized dynamic posturography, assessing sensorimotor function after return from ISS-A45
- Computing, human, and super forecasting-1072
- Concentrators, portable oxygen, to reverse altitude-induced hypoxemia-351
- Cone contrast test, color vision testing using tablet displays-56
- Confinement  
*Cognition* test battery for spaceflight-942, E1(Nov)  
sleep deprivation in simulated spaceflight operations and-865  
vs. isolation, as model for Mars missions-131
- Contrast sensitivity, hypobaric hypoxia effects on at high altitude-118
- Core strengthening, in helicopter crewmembers with low back pain-889
- Corneal pathologies, keratoconus-1004
- Corneal thickness, hypobaric hypoxia effects on contrast sensitivity and-118
- Cosmonauts, exercise countermeasures used by in first decade on ISS-A24, A32
- Countermeasures  
5-day bed rest effect on portal and lower limb veins-524  
Exercise—See Exercise Countermeasures  
for post-spaceflight orthostatic hypotension-88
- Craniofacial muscles, infrared thermography of, in military pilots with bruxism-374, E4 (Apr)
- Craniopharyngioma, aeromedical disposition-477
- Crowdsourcing, human computing and super forecasting-1072
- Cycle ergometer, evolution of, during first decade on ISS-A7, A32

## D

- Database management, storing and processing complex data sets with HDF5-659
- Datalink weather technology, training general aviation pilots for convective weather situations-881
- De Haven, Hugh, Crash Injury Research Project at Cornell-849
- Death, reported in-flight, AsMA medical guidelines for advising patients-571
- Decompression, end-tidal CO<sub>2</sub> in recreational rebreather divers-41
- Decompression illness, first aid oxygen treatment for goats after simulated submarine escape-1020

Decompression sickness  
 DDFPe treatment in rats-21  
 Hypobaric, treatment model for-508  
 identifying subtle presentation of-1058  
 Deconditioning, in spaceflight—*See* Exercise countermeasures  
 Degraded visual environments  
 helmet-mounted symbology system concepts in-588, 714  
 in-flight study-714  
 simulator study-588  
 Dehydration, effects on cardiac autonomic control in fighter pilots-875  
 Dental barotrauma, in military divers-652  
 Dental occlusion, craniofacial muscle thermography in military pilots with bruxism-374, E4 (Apr)  
 Dentistry  
 craniofacial muscle thermography in military pilots with bruxism-374, E4 (Apr)  
 dental barotrauma in military divers-652  
 Diabetes mellitus, G tolerance in subjects with implanted insulin pumps-407  
 Diagnostics, portable radiography for ISS and explorer class missions (Commentary)-140  
 Diaphragmatic breathing, for motion sickness management-452  
 Digital fabrication  
 onsite printing of custom mallet splints for Mars analogue crewmembers-911  
 ultra-portable solar-powered 3D printers for use onsite-830  
 Diplopia, in Miller-Fischer syndrome-918  
 Disorientation—*See* Spatial disorientation  
 Displacement, group dynamics during isolation at space station analogue-819  
 Distressed submarine (DISSUB), first aid oxygen treatment for decompression illness after escape-1020  
 Diving  
 DDFPe for decompression sickness in rats-21  
 dental barotrauma in French military divers-652  
 end-tidal CO<sub>2</sub> in recreational rebreather divers-41  
 hypercapnic ventilatory response and repeated apneas-27  
 in-flight echocardiography after a week of Scuba diving-488(Letter)  
 increased prevalence of white matter injury in healthy divers-928  
 Dodecafluoropentane (DDFPe), treatment of decompression sickness in rats-21  
 Dose-effect relationships, between hypergravity and autonomic circulatory regulation-535  
 Drowning, novel rescue-tube device for in-water resuscitation-379  
 Dual-energy X-ray absorptiometry (DXA), challenges of estimating fracture risk with-628  
 Dysphagia, eosinophilic esophagitis with food impaction and-742

## E

Ear, nose, and throat (ENT)  
 Ménière's disease in a pilot-662  
 otosclerosis and fitness to fly-1039  
 Earplugs, molded communication, in military aviation-808  
 Echocardiography, in-flight, after a week of Scuba diving-488(Letter)  
 Ejection, from aircraft, factors associated with delayed-774  
 Elderly passengers, pulmonary artery pressure response to simulated air travel-529  
 Electrical muscle stimulator, evolution of, during first decade on ISS-A32  
 Electrocardiogram monitors, evolution of, during first decade on ISS-A7  
 Emergencies, in-flight  
 factors associated with delayed ejection-774  
 reported medical, AsMA guidelines for advising patients-571  
 Emergency breathing system, in helicopter underwater egress training-82  
 Emergency medical services (EMS), ground and helicopter, comparing travel times with GIS-620

Emergency underwater breathing apparatus, rebreather unit to prolong underwater survival time in cold water-1028  
 Emotions  
 cognitive workload and physiological parameters in helicopter pilots-1052  
 group dynamics during isolation at space station analogue-819  
 Endurance, exercise tests and simulated mission task performance in astronauts-982  
 Environmental tobacco smoke, exposure to, in commercial airline pilots-458  
 Environments, extreme—*See* Extreme environments  
 Eosinophilic esophagitis  
 in an air traffic control student-418  
 with dysphagia and food impaction-742  
 Epilepsy, aeromedical disposition in a fighter pilot-500  
 Ergonomics  
 core strengthening in helicopter crewmembers with low back pain-889  
 flight bags as cause of back injuries in commercial pilots-563  
 Erratum-580  
 Error analysis, Human Factors Analysis and Classification System-728  
 Esophagitis, eosinophilic  
 in an air traffic control student-418  
 with dysphagia and food impaction-742  
 European Space Agency (ESA)  
 exercise countermeasure hardware for ISS-A7  
 physical training for long-duration spaceflight aboard ISS-A14  
 Evidence-based medicine  
 aeromedical risk assessment of pharmaceuticals using-824  
 in human performance-64  
 Exercise  
 core strengthening in helicopter crewmembers with low back pain-889  
 duration of, effects on acute mountain sickness-614  
 effect on kidney function on ISS-472  
 mood state in normobaric hypoxia and-976  
 tests of astronauts, and simulated mission task performance-982  
 upper body aerobic, as predictor of lower body performance-599  
 Exercise countermeasures  
 First Decade on ISS (Supplement to December issue)  
 aerobic exercise responses after-A78  
 computerized dynamic posturography to assess sensorimotor function after-A45  
 evaluating bone loss in ISS astronauts-A38  
 evolution of Russian countermeasures-A32  
 functional fitness test results after-A87  
 hardware evolution for-A7  
 isokinetic strength changes after-A68  
 lessons learned on expeditions 1-25-A1  
 orthostatic intolerance after ISS and shuttle missions and-A54  
 physical training for-A14  
 Russian systems for-A24  
 summary and future directions for-A92  
 Explorer-class missions  
 confinement vs. isolation as analogue environment for-131  
 portable radiography for (Commentary)-140  
 team composition issues for future-548, E1(June)  
 Extravehicular activity training  
 causes of astronaut shoulder injury in space suits-606  
 exercise tests and simulated mission task performance in astronauts-982  
 Extreme environments  
 altitude and seasonality impact on sleep in Antarctica-392  
 confinement vs. isolation in Mars mission models-131  
 personality factors in unsuccessful special forces polar expedition-567  
 ultra-portable solar-powered 3D printers for use onsite-830  
 Eye fixations, spatial patterns of, and ultradian rhythms in pilots

## F

- F-16 pilots—*See also* Military pilots  
 modern air combat developments and neck and back pain in-936  
 neck pain in F-16 vs. Typhoon pilots-402
- Fatigue  
 6-month assessment of sleep during naval deployment-481  
 cabin crew, management on ultra-long range flights-705  
 subtle presentation of decompression sickness in aircrew-1058  
 validation of portable psychomotor vigilance test-428
- Fatigue risk management system, for cabin crew on ultra-long range flights-705
- Fear of flying, cognitive and virtual reality treatment program for-723
- Fearless temperament, personality factors in unsuccessful special forces polar expedition-567
- Female pilots, recurrent and transient spinal pain among commercial helicopter pilots-962
- Field studies  
 6-month assessment of sleep during naval deployment-481  
 effect of transcranial bright light on jet lag symptoms-344, E1, E2, E3(Apr)
- Fighter jets, restraint harness performance during flight maneuvers-466
- Fighter pilots—*See* Military pilots
- First aid  
 AsMA guidelines for in-flight medical care-572  
 oxygen treatment for decompression illness after submarine escape-1020
- Fitness to fly, aircrew—*See also* Aeromedical disposition  
 history of Schneider index-1081  
 otosclerosis and-1039
- Fitness to fly, passengers  
 AsMA medical guidelines on-656  
 pulmonary artery pressure response to simulated air travel-529
- Fitness, physical  
 effects on cardiac autonomic control in fighter pilots-875  
 functional fitness testing after long-duration spaceflight on ISS-A87
- Flight attendants, occupational exposure measurement error in study of-990
- Flight bags, as cause of back injuries in commercial pilots-563
- Flight duties, return to—*See* Aeromedical disposition
- Flight maneuvers  
 determining psychomotor performance of helicopter pilots during-641  
 restraint harness performance during-466
- Flight phobia, cognitive and virtual reality treatment program for-723
- Flight surgeons  
 origin of first naval-149  
 pre-World War I historical perspective on-424
- Fluid loading, countermeasure for orthostatic hypotension after spaceflight-88
- Food impaction, eosinophilic esophagitis with dysphagia and-742
- Foot drop, sudden, after centrifuge training-146
- Force loader, evolution during first decade on ISS-A32
- Fracture risk, in astronauts, challenges of estimating with DXA-628  
 Parkinson's disease, aeromedical implications in civilian pilots-1046
- Functional fitness testing, after long-duration spaceflight on ISS-A87
- Fused deposition modeling  
 onsite printing of custom mallet splints-911  
 ultra-portable solar-powered 3D printers-830

## G

- G forces  
 acute spinal injury in fighter pilots after centrifuge training-386  
 G duration tolerance of fighter pilots, unpredictability of-397  
 scrotal hematoma after centrifuge training in fighter pilot with varicocele-1063

- G-suits, positive pressure breathing simulation model at ground level-15
- Gait, at sea while walking fore-aft vs. athwart-435
- Gas exchange threshold, predicting lower body performance with upper body aerobic exercise-599
- Gastroenterology  
 cholelithiasis in Air Force aeromedical evacuation nurse-577  
 eosinophilic esophagitis in air traffic control student-418  
 eosinophilic esophagitis with dysphagia and food impaction-742  
 Meckel's diverticulum in a student fighter pilot-1006
- Gemini program, aerospace medicine in 1965-73
- Gender differences  
*Absent Aviators—Gender Issues in Aviation* (Book Review)-493  
 in motion sickness induced by linear visual oscillation-787  
 in navigational memory of pilots and non-pilots-103
- General aviation, training pilots for convective weather situations-881
- Geographic information systems (GIS), comparing ground and helicopter EMS travel times with-620
- Glioma, aeromedical disposition of low grade-477
- Global health, ultra-portable solar-powered 3D printers for use off the grid-830
- Go/no-go task, overactive performance monitoring at chronic high altitude-860
- Goats—*See* Animal models
- Guidelines, AsMA medical, for air travel—*See* Medical Guidelines

## H

- Hand injuries, onsite 3D printing of custom mallet splints for Mars analogue crewmembers-911
- Hand, foot, and mouth disease, aeromedical disposition in-497
- Hardware systems, for exercise countermeasures, evolution of on ISS-A7
- Hardy Rand Rittler (HRR) color vision test, compared with mColorDx test-852
- Head trauma, white matter hyperintensities after prior trauma with loss of consciousness-928
- Head-down tilt  
 fluid loading effects and cardiovascular responses-88  
 lower body negative pressure reduces intraocular and intracranial pressure during-3
- Health, of air traffic controllers on different shift systems-895
- Hearing loss  
 Ménière's disease in a pilot-662  
 otosclerosis and fitness to fly-1039
- Hearing protection, molded communication earplugs in military aviation-808
- Heart disease—*See* Cardiology
- Heart rate monitors, evolution during first decade on ISS-A7
- Heart rate variability  
 diaphragmatic breathing for motion sickness management-452  
 estimating pilots' psychophysiological load-518  
 physical fitness and dehydration effects on autonomic control of-875
- Heart valves, artificial, potential risks to commercial spaceflight participants with-999
- Helicopter pilots  
 cognitive workload and physiological parameters in multitask activity-1052  
 conservative management of mechanical neck pain in-907  
 determining psychomotor performance during flight maneuvers-641  
 helmet-mounted symbology concepts in degraded visual environments-588  
 neck pain due to night vision goggles-46  
 recurrent and transient spinal pain among commercial-962
- Helicopters  
 Blackhawk UH-60-34, 815

 Military aircrew—*See also* Military pilots  
 assessment of alternative Army aircrew eyewear-1014  
 cabin temperature effect on well-being on ad hoc platform flights-125  
 identifying subtle presentation of decompression sickness in-1058  
 isolated perivesicular hematoma after parachuting-136  
 neck pain due to night vision goggles-46  
 pneumocephalus and neurosurgery in rotary aircrew-59, 414(Letter)  
 prolonged restricted sitting effects in UH-60 helicopters-34

tissue changes during operational load bearing in UH-60 helicopters-815

Military divers, dental barotrauma in-652

Military flight cadets  
incidental suprasellar mass in-477  
white matter hyperintensities after prior head trauma-1075

Military parachuting, isolated perivesicular hematoma after-136

Military personnel, personality factors in unsuccessful special forces polar expedition-567

Military pilots  
acute low back pain in fighter pilots-842  
acute spinal injury after centrifuge training in fighter pilots-386  
bruxism, craniofacial muscle thermography in-374, E4(Apr)  
clinical markers of metabolic syndrome among-970  
modern air combat developments and neck and back pain in fighter pilots-936  
molded communication earplugs for-808  
neck pain and cervical sagittal alignment in fighter vs. non-fighter pilots-445  
neck pain in F-16 vs. Typhoon pilots-402  
physical fitness and dehydration effects on cardiac autonomic control in fighter pilots-875  
real-time effects of transient near-anoxia on-76  
unpredictability of G duration tolerance in fighter pilots-397

Miller-Fischer syndrome, aeromedical disposition-918

Mobilization therapy, for mechanical neck pain in helicopter pilots-907

Mood state, effect of exercise on, in normobaric hypoxia-976

Motion sickness  
and visual blur in optokinetic drum-440  
diaphragmatic breathing for management of-452  
induced by linear visual oscillation, gender differences in-787  
sleep duration in rough sea conditions-901

Multiple sclerosis, atypical optic neuritis as possible sign of-845

Multitask activity, cognitive workload and physiological parameters in helicopter pilots-1052

Musculoskeletal injury, tissue changes on MRI during load bearing in helicopter aircrew-815

Myelolipoma, adrenal-421

## N

National Aeronautics and Space Administration (NASA)  
exercise countermeasure hardware evolution aboard ISS-A7  
Exercise Countermeasures: The First Decade on ISS (Supplement to December issue)-A1  
physical training for long-duration spaceflight on ISS-A14  
role in development of telemedicine-504

Naval deployment, 6-month assessment of sleep at sea during-481

Navigational memory, gender differences in pilots and non-pilots-103

Neck pain  
and cervical sagittal alignment in Air Force pilots-445  
due to night vision goggles in military helicopter aircrew-46  
in F-16 vs. Typhoon fighter pilots-402  
in fighter pilots related to modern air combat developments-936  
mechanical, conservative management in helicopter pilots-907  
recurrent and transient, among commercial helicopter pilots-962

Nephrectomy, for adrenal myelolipoma-421

Nerve conduction studies, sudden foot drop after centrifuge training-146

Neurobehavioral performance, validation of portable psychomotor vigilance test-428

Neurological conditions  
complex regional pain syndrome-574  
manual cervical manipulation and vertebral artery dissection-1066  
Miller-Fischer syndrome-918  
Parkinson's disease-1046  
pneumocephalus in rotary aircrew-59, 414(Letter)  
sudden foot drop after centrifuge training-146

Neuropathy, peroneal, sudden foot drop after centrifuge training-146

Neurophilosophy, *Touching a Nerve* (Book Review)-752

Neuropsychological tests, *Cognition* test battery for spaceflight-942, E1(Nov)

Neurosurgery, pneumocephalus in rotary aircrew-59, 414(Letter)

Next Generation Weather Radar (NEXRAD), training general aviation pilots on-881

Night vision goggles  
neck and back pain in fighter pilots related to-936  
neck pain in military helicopter aircrew due to-46

Nitric oxide, exhaled, in acute normobaric hypoxia-693

Noise, molded communication earplugs for military aviation-808

Normobaric hypoxia  
effects on acute mountain sickness-614  
effects on performance and recovery time-357  
exercise improves mood state in-976  
exhaled nitric oxide in acute-693

Nutritional status, of air traffic controllers on different shift systems-895

## O

Obesity, morbid, screening for sleep apnea in pilots with (AsMA Position Paper)-835

Obstructive sleep apnea, screening in morbidly obese pilots (AsMA Position Paper)-835

Occlusal splint, craniofacial muscle thermography in military pilots with bruxism-374, E4 (Apr)

Occupational exposures  
flight bags as cause of back injuries in commercial pilots-563  
isolated perivesicular hematoma after military parachuting-136  
measurement error in study of flight attendants-990  
prostate cancer risk in pilots-112; retraction-491  
recurrent and transient spinal pain among commercial helicopter pilots-962  
subtle presentation of decompression sickness in aircrew-1058

Odontological problems, dental barotrauma in French military divers-652

Operation complexity, sleep deprivation and confinement in simulated spaceflight-865

Ophthalmology  
atypical optic neuritis with Uhthoff phenomenon-845  
color vision testing using tablet displays-56  
comparison of mColorDx color vision test and three printed tests-852  
hypobaric hypoxia effects on corneal thickness and contrast sensitivity-118  
keratoconus in a flight surgeon-1004  
Miller-Fischer syndrome-918  
modified protocol for color vision screening-747  
reducing intraocular and intracranial pressure during head-down tilt-3  
unusual ocular complication of barotrauma at altitude-994

Optic flow, effect of stimuli on ground surfaces on vection-794

Optic neuritis, atypical, with Uhthoff phenomenon-845

Optic neuropathy, unusual complication of barotrauma at altitude-994

Optometry, assessment of alternative Army aircrew eyewear-1014

Orthopedics, lateral epicondylitis in a pilot-1077

Orthostatic intolerance  
after ISS and space shuttle missions-A54  
fluid loading effects in head-down tilt-88

Orthostatic stress, simulated, with cognitive stress, cerebral blood flow velocity during-688

Osteoma, pneumocephalus and neurosurgery in rotary aircrew-59

Otosclerosis, and aircrew fitness to fly-1039

Over the counter medications, vitamin A toxicity from sports supplements-920

Overconfidence, personality factors in unsuccessful special forces polar expedition-567  
 Oxygen  
   first aid for decompression illness after submarine escape-1020  
   positive pressure breathing simulation model at ground level-15  
   supplemental, AsMA medical guidelines for air travel and-657  
 Oxygen concentrators, portable, to reverse altitude-induced hypoxemia-351  
 Oxygen exposure limits, end-tidal CO<sub>2</sub> in recreational rebreather divers-41  
 Oxygen window, hypobaric decompression sickness treatment model-508

## P

Pacemakers, simulated suborbital spaceflight in subjects with-410  
 Pachymetry, hypobaric hypoxia effects on corneal thickness and contrast sensitivity-118  
 Pain management, complex regional pain syndrome in fighter squadron crew-574  
 Parachuting, isolated perivesicular hematoma after-136  
 Parkinson's disease, aeromedical implications-1046  
 Passengers, aircraft  
   AsMA medical guidelines for physicians advising—486, 571, 572, 656, 657  
   airline special services-657  
   fitness to fly and medical clearances-656  
   in-flight medical care-572  
   reported in-flight medical events and death-571  
   stresses of flight-486  
   fear of flying, cognitive and virtual reality treatment program for-723  
   pulmonary artery pressure response to simulated air travel-529  
 Penguin-3 loading suit, evolution during first decade on ISS-A32  
 Perceptual deficits, of normobaric hypoxia, recovery time from-357  
 Perfluorocarbons, DDFPe for decompression sickness in rats-21  
 Performance—*See* Human performance  
 Performance monitoring, overactive, due to chronic high altitude exposure-860  
 Peroneal neuropathy, sudden foot drop after centrifuge training-146  
 Personality traits, as factor in unsuccessful special forces polar expedition-567  
 Personnel selection  
   effect on remotely piloted aircraft human-systems integration-736  
   humans as critical factor in aviation security (Commentary)-915  
 Pharmaceuticals, aeromedical risk assessment of-824  
 Photovoltaics, ultra-portable solar-powered 3D printers for use on-site-830  
 Physical activity—*See* Exercise  
 Physical fitness, effects on cardiac autonomic control in fighter pilots-875  
 Physical therapy, for lateral epicondylitis in a pilot-1077  
 Physical training, for long-duration spaceflight aboard ISS-A14  
 Pilot-physicians, trained for Manned Orbiting Laboratory program-1010  
 Pilots—*See also* Aircrew, Helicopter pilots, and Military pilots

   gender differences in navigational memory vs. non-pilots-103  
   general aviation-training for convective weather situations-881  
   helmet-mounted symbology concepts in degraded visual environments-588, 714  
   measuring tax complexity in flight-698  
   medical symptoms associated with work and home environments-458  
   mental health of, AsMA Working Group recommendations on-1013  
   morbidly obese, screening for sleep apnea in (AsMA Position Paper)-835

Parkinson's disease in, aeromedical implications-1046  
 preventing prospective memory failures in-366  
 risk of prostate cancer in-112; retraction-491  
 solar eye protection practices of civilian aircrew-953  
 spatial patterns of eye fixations and ultradian rhythms in-647  
 Planetary exploration missions  
   confinement vs. insolation as analogue environment for-131  
   effects of personality and decision making on team performance-567  
   team composition issues for future-548, E1(June)  
 Pneumocephalus, and neurosurgery in rotary aircrew-59, 414(Letter)  
 Podcasts, as research resources-415  
 Polar regions  
   altitude and seasonality impact on sleep in-392  
   personality factors in unsuccessful special forces expedition-567  
   statin use and acute mountain sickness in-97  
 Portal veins, effect of 5-day bed rest with microgravity countermeasures-524  
 Positive pressure breathing, model for simulating at ground level-15  
 Postural instability, assessment after return from ISS-A45  
 Posturography, dynamic computerized, assessing re-entry from ISS with-A45  
 Preflight medical evaluations, for aircraft passengers, AsMA medical guidelines on-656  
 Preterm birth, occupational exposure measurement error in flight attendant study-990  
 Priapism, caused by sickle cell trait-664  
 Prospective memory, preventing failures of, in aviation-366  
 Prostate cancer, meta-analysis of risk in pilots-112; retraction-491  
 Protective clothing, positive pressure breathing simulation model at ground level-15  
 Pseudoisochromatic plates Ishihara compatible (PIPIC) test, compared with mColorDx test-852  
 Psychiatric disorders, brief reactive psychosis in a military pilot-69  
 Psycho-motor Vigilance Test, for cabin crew fatigue on ultra-long range flights-705  
 Psychomotor performance, of helicopter pilots during flight maneuvers-641  
 Psychomotor vigilance test, validation of portable touchscreen-428  
 Psychophysiological load, of pilots, heart rate variability in estimation of-518  
 Psychosis, brief reactive, in a military pilot-69  
 Psychosocial environment, of commercial airline pilots, medical symptoms associated with-458  
 Public health concerns, hand, foot, and mouth disease-497  
 Pulmonary edema, high altitude, exhaled nitric oxide in acute normobaric hypoxia-693  
 Pulmonary function system, evolution of, during first decade on ISS-A7  
 Pulmonary sarcoidosis, diagnosis and aeromedical disposition-67  
 Pulmonary vasoconstriction, hypoxic, in simulated air travel-529  
 Pulse oximeters, signal fusion for robust hypoxia detection-495
